September 15 to 19, 2025

University of Graz, Austria

Summer School on Standardisation

Things determine how we live.

To be able to help shape the design of things, knowledge of standardisation is required. This knowledge will be imparted in the summer school to three groups: Teachers, Researchers, and Technology Transfer Professionals.

Programme

The **summer school** on standardisation begins in mid-September with a basic module for all participants. The summer school starts on **Monday, September 15**, with an informal get-together where all participants can get to know each other and exchange ideas on **standardisation** and **EU values and interests (Stand-EUVI)**

On Tuesday, September 16, participants will work with trainers from academia and standardisation institutions to acquire basic knowledge of **"Stand-EUVI"**, which will be integrated into their own work environment in the afternoon.

From 17 September, the summer school will continue in parallel with three workshops; these three workshops are aimed at:

- **Technology Transfer Professional** (led by Katrin Fladischer)
- **Researchers** (led by Karl Grün)
- **Teachers** (Head: Elisabeth Staudegger)

In all three slots, concepts will be developed that could later be rolled out sustainably.

Importantly, this summer school is a pilot project of the Horizon Europe project **EDU4Standards.eu**; participation is free of charge.

UNI for LIFE is a cooperation partner; after a successful pilot, the format will be rolled out into "real-life" operation.
