Standards in Belgium

Project description:

The programme combines a short introductory session with hands-on group exercises and plenary discussions. The interactive format is designed to maximise engagement and demonstrate the relevance of standardization in academic and professional contexts. It is open to students from all disciplines.

Why attending:

- Experience the standardization process through an interactive "Standard in a Day" simulation.
- Develop practical skills in **negotiation, consensus-building, teamwork and decision-making**.
- Discover how standards shape **innovation, research and industry**.
- **Learn** directly from experts in **standardization**.
- Gain insight into **career opportunities** where standardization plays a key role.
- Receive a **certificate of participation**.
- **Network** with peers, academics and professionals from the standardization community.
